## New Page - Cart

### Low Fidelity Mockup

I added a quick low fidelity sketch for the cart page, which lists all of the items the user added to their cart (including item name, quantity, specific details and price) and a side summary panel with the total amount of items and costs. It's very simple and follows conventional shopping cart page design that users are likely to be familiar with.

## High Fidelity Mockup

The high fidelity mockup has a more structured grid system and uses the theme color of fluff stuff (black, white, gray). I also added a remove “x” for each item in case the user decides not to purchase.

Check Out

The actual implementation looks very similar to the high fidelity mockup.
